

Download PDF EBUPOT otomatis

1. Pilih bupot yang mau didownload
 - a. BPPU <https://coretaxdjp.pajak.go.id/withholding-slips-portal/id-ID/ebupotbpu/issued>
 - b. BP21 <https://coretaxdjp.pajak.go.id/withholding-slips-portal/id-ID/ebupotbp21/issued>
 - c. BPA1 <https://coretaxdjp.pajak.go.id/withholding-slips-portal/id-ID/ebupotbpa1/issued>

2. filter masa yang akan didownload, bisa multiple ya inputnya di appnya 0126;0226 atau 0126-0526

BPPU dan BP21

	Masa Pajak ↑↓	Nomor
☐	Juli 2026 Xv	

Tidak ada data yang ditemukan.

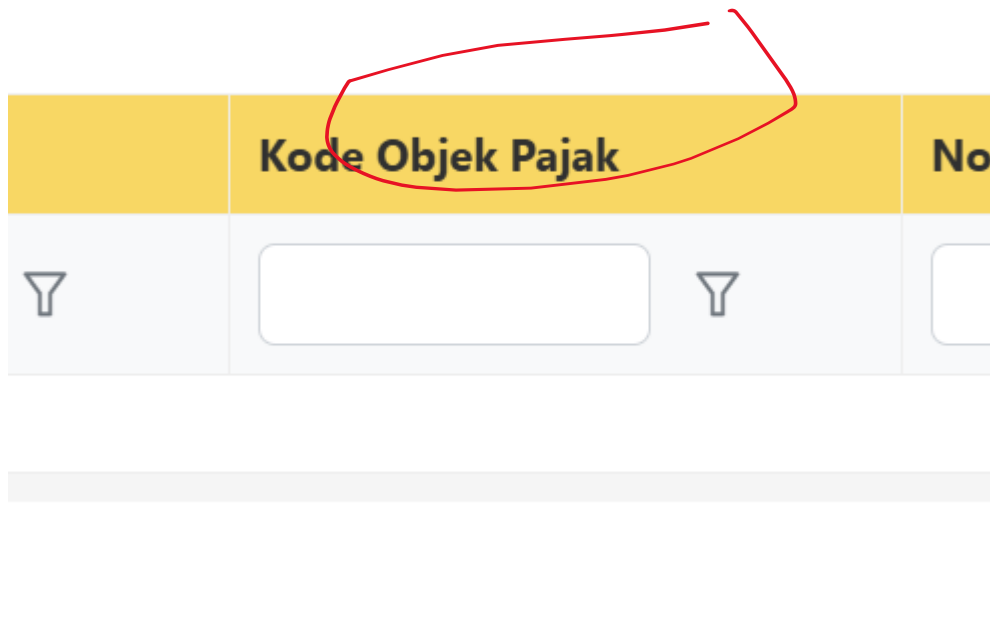

BPA1

	Masa Awal Periode Penghasilan ↑↓	Masa Akhir Periode Penghasilan ↑
☐	Pilih Masa Awal Periode Penghasilan v	Juli 2026 Xv

Tidak ada data yang ditemukan.

< > 10 v

3. filter kode objek yang mau didownload ya (khusus BPPU dan BP21)
default all (bisa pilih misal 21-100-35;21-100-20)

	Kode Objek Pajak	No
		

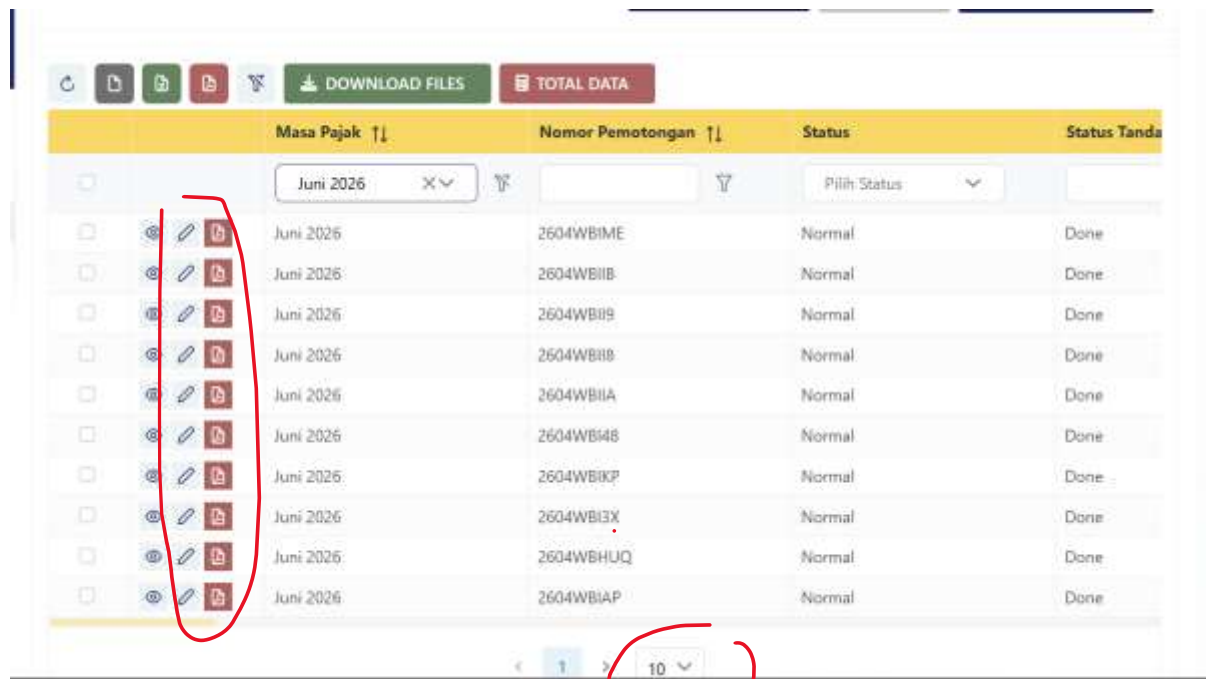

Urutan downloadnya contoh BP21 -> masa Juni -> kode 21-100-35 -> Masa Apr -> kode 21-100-35

Nama filenya

MMYY – Kode Objek Pajak – NIK – NAMA.pdf

Langsung dimasukkan ke folder ya misal PNG/BP21/0126/filenya

Cara download:

ketika tampilan filter benar ada semacam ini

By default tampilannya 10, coba cari pendekatan yang enak downloadnya brp kalo manual biasanya di mode 50
downloadnya harus 1 1 klik deh kalo manual, coba Anda cari cara buat download pdf tersebut, kalo sudah Anda bisa next di halaman berikutnya sampai halaman tidak bisa dinext

problem yang biasa terjadi adalah kedobel atau kelewat saat download. Selain itu coretax auto logout setelah bbrp waktu sedangkan download butuh waktu lama (solusinya saya pencet nomor pemotongan dulu agar terfilter jadi urutannya selalu sama)

Sejauh ini otomasi dilakukan menggunakan extention chrome yang bisa pencet otomatis
pakai ini

```
// content.js
```

```
chrome.runtime.onMessage.addListener((message, sender, sendResponse) => {  
  if (message.newUrl) {  
    alert("URL changed to: " + message.newUrl);
```

```
}  
});
```

```
chrome.runtime.onMessage.addListener((request, sender, sendResponse) => {  
  if (request.message === 'downloadAllFaktur') {  
    const buttons = document.querySelectorAll('#DownloadButton');  
    let delay = 2000; // 2000 mili detik atau 2 detik, ubah bila perlu.  
  
    buttons.forEach((button, index) => {  
      setTimeout(() => {  
        button.click();  
        console.log('PDF terunduh ' + (index + 1));  
      }, delay * index);  
    });  
  }  
});
```

```
var jumlahCek = 0;
```

```
async function load_toolbar() {  
  //let newElement = new DOMParser().parseFromString('<div style=" position:  
fixed; bottom: 170px; right: 0px; padding: 10px;"><button id="triggerDownloadConsole"  
type="button" icon="fa-solid fa-download" class="p-element ct-ovw-btn-save mr-2 p-  
button p-button-success p-component ng-star-inserted">DOWNLOAD</button></div>',  
'text/html').body.childNodes[0];  
  
  buttonDownload = '<span class="p-button-icon p-button-icon-left fa-solid fa-  
download" aria-hidden="true"></span><span class="p-button-label">DOWNLOAD  
FILES</span>';
```

```
buttonDownload = '<button id="triggerDownloadConsole" type="button"
icon="fa-solid fa-download" class="p-element ct-ovw-btn-save mr-2 p-button p-
button-success p-component ng-star-inserted">' + buttonDownload + '</button>'
```

```
buttonTotal = '<span class="p-button-icon p-button-icon-left fa-solid fa-
calculator" aria-hidden="true"></span><span class="p-button-label">TOTAL
DATA</span>';
```

```
buttonTotal = '<button id="triggerTotal" type="button" icon="fa-solid fa-
calculator" class="p-element ct-ovw-btn-save mr-2 p-button p-button-danger p-
component ng-star-inserted">' + buttonTotal + '</button>'
```

}

//load_toolbar();

```

tapi saya ingin Anda kembangkan krn sistem tersebut unreliable, coba Anda pendekatannya selalu pakai code base jangan visual base agar lebih reliable, selain itu coretax web tidak stabil kdang lemot, jadi Anda harus bisa akomodasi kelemotannya, jangan pakai delay2 an krn akan memperlama kalo websitenya lagi cepat
